

Tick-Borne Encephalitis Virus gE middle Recombinant Protein

Recombinant Tick-Borne Encephalitis Virus gE middle (50-250)

CATALOG #
AAA38536

APPLICATIONS
Western Blot, ELISA

PRODUCT SYNONYMS

Tick-Borne Encephalitis Virus gE middle; Recombinant Tick-Borne Encephalitis Virus gE middle (50-250); TBEV gE middle; Tick-Borne Encephalitis Virus gE Middle Recombinant; Encephalitis gE middle; Tick-Borne Encephalitis Virus gE middle recombinant protein

PRODUCT SPECIFICATIONS

Specificity	Immunoreactive with sera of encephalitis virus infected individuals.
Purity/Purification	Encephalitis protein is >95% pure as determined by 10% PAGE (coomassie staining). Encephalitis protein was purified by proprietary chromatographic technique.
Form/Format	20mM MES pH 6.5, 8M urea, 200mM NaCl and 0.05% Tween-20.
Applicable Applications for Tick-Borne Encephalitis Virus gE middle recombinant protein	WB (Western Blot), ELISA
Preparation and Storage	Encephalitis protein although stable at 4 degree C for 1 week, should be stored below -18 degree C. Please prevent freeze thaw cycles.

ADDITIONAL INFORMATION

Related Product Information for Tick-Borne Encephalitis Virus gE middle recombinant protein	Description: The E Coli derived recombinant protein contains the Tick-borne Encephalitis Virus glycoprotein E middle regions, 50-250 amino acids. Introduction: TBE is caused by tick-borne encephalitis virus (TBEV), a member of the family Flaviviridae. A closely related virus in Far Eastern Eurasia, Russian spring-summer encephalitis virus (RSSEV). The family Flaviviridae includes other tick-borne viruses are closely related to TBEV and RSSEV, such as Omsk hemorrhagic fever virus & Kyasanur Forest virus. Louping ill virus is also a member of this family.
Product Categories/Family for Tick-Borne Encephalitis Virus gE middle recombinant protein	Viral Antigens ; ENCEPHALITIS VIRUS ; Viral Antigens ; Encephalitis

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
