WB (Western Blot)

Western blot analysis of 20ng of DDDDK-tagged recombinant GGP1 protein using 1 µg of DDDDK antibody to immunoprecipitate and 1 µg/ml anti-GGP1 antibody to detect.

WB (Western Blot)

Western blot analysis of a DDDDK-tag-containing recombinant protein with DDDDK-tag antibody at (A) 0.125 and (B) 0.25 µg/ml.

ADDITIONAL INFORMATION

Related Product Information for anti-DDDDK-tag antibody	Epitope tags provide a method to localize gene products in a variety of cell types, study the topology of proteins and protein complexes, identify associated proteins, and characterize newly identified, low abundance or poorly immunogenic proteins when protein specific antibodies are not available. DDDDK-tag is one of the more popular epitope tags for expressed recombinant proteins.
