

Mouse HAT-tag Monoclonal Antibody

HAT-tag Antibody [9A2F8]

CATALOG # AAA40877	HOST Mouse	REACTIVITY Tag	APPLICATIONS Immunoprecipitation, Western Blot, ELISA
------------------------------	----------------------	--------------------------	---

PRODUCT SYNONYMS

HAT-tag; Monoclonal Antibody; HAT-tag Antibody [9A2F8]; Hat-tag; Hat; anti-HAT-tag antibody

PRODUCT SPECIFICATIONS

Host	Mouse
Reactivity	Tag
Clonality	Monoclonal
Isotype	IgG
Clone Number	9A2F8
Purity/Purification	HAT-tag antibody is Protein A chromatography purified.
Form/Format	Liquid
Concentration	1 mg/mL (varies by lot)
Applicable Applications for anti-HAT-tag antibody	IP (Immunoprecipitation), WB (Western Blot), ELISA
Immunogen	HAT-tag antibody was raised against a synthetic peptide containing KDHLIHNVHKEFHAAHNK.
Conjugate	Unconjugated
Buffer	Hat-tag antibody is supplied in PBS containing 0.02% sodium azide.
Preparation and Storage	Hat-tag antibody can be stored at 4 degree for up to one year. Antibodies should not be exposed to prolonged high temperatures.

IMAGES

WB (Western Blot)

Western blot analysis of (1) 20 ng of HAT-tagged recombinant GGP1 protein and (2) 20 ng of HAT-tagged recombinant GGP1 protein using 1 μg of HAT-tag antibody to immunoprecipitate and 1 μg/ml anti-GGP1 antibody to detect.

WB (Western Blot)

HAT-tag antibody (9A2F8)1 Western blot analysis of (1) 200 ng (2) 100 ng, (3) 50 ng and (4) 25 ng of a HAT-tag containing recombinant GGP1 protein with HAT-tag antibody at 0.5 ug/mL.

ADDITIONAL INFORMATION

Related Product Information for anti-HAT-tag antibody

Background: Epitope tags provide a method to localize gene products in a variety of cell types, study the topology of proteins and protein complexes, identify associated proteins, and characterize newly identified, low abundance or poorly immunogenic proteins when protein specific antibodies are not available. HAT-tag is one of the more popular epitope tags for expressed recombinant proteins.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
