

Rat Pepsin, PP ELISA Kit | PP elisa kit

Rat Pepsin, PP ELISA Kit

CATALOG #
AAA41149

REACTIVITY
Rat

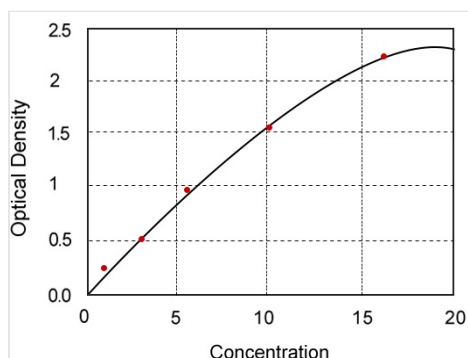

PRODUCT SYNONYMS

Pepsin; PP; Rat Pepsin; PP ELISA Kit; PP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	5ng/ml - 1400ng/ml
Sensitivity	2.38ng/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for PP elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Rat Pepsin (also known as PP) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Rat PP antibody. PP present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Rat PP Antibody is added and binds to PP in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated PP antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Rat PP. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
