ADDITIONAL INFORMATION

Related Product Information for 26S PSM elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of Rabbit Vascuoar Endothelial Cell Growth Factor Receptor 3 (also known as VEGFR-3/Flt-4) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates. Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Rabbit VEGFR-3/Flt-4 antibody. VEGFR-3/Flt-4 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Rabbit VEGFR-3/Flt-4 Antibody is added and binds to VEGFR-3/Flt-4 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated VEGFR-3/Flt-4 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Rabbit VEGFR-3/Flt-4. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
