

Human dystrophin ELISA Kit

Human dystrophin ELISA Kit

CATALOG #
AAA41306

REACTIVITY
Human

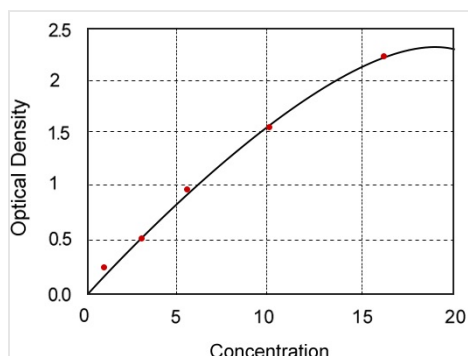

PRODUCT SYNONYMS

dystrophin; Human dystrophin ELISA Kit; dystrophin elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	8
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.05mg/ml - 10mg/ml
Sensitivity	0.029mg/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for dystrophin elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of human Dystrophin (also known as DMD) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human DMD antibody. DMD present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human DMD Antibody is added and binds to DMD in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated DMD antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human DMD. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

NCBI AND UNIPROT INFORMATION

NCBI GI #	241110
NCBI Official Full Name	dystrophin, partial

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
