

Hamster Immunoglobulin G1, IgG1 ELISA Kit | IgG1 elisa kit

Hamster Immunoglobulin G1, IgG1 ELISA Kit

CATALOG #
AAA41355

REACTIVITY
Hamster

PRODUCT SYNONYMS

Immunoglobulin G1; IgG1; Hamster Immunoglobulin G1; IgG1 ELISA Kit; IgG1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Hamster
Samples	Serum, Plasma, Cell Culture Supernates, Cell Lysates, Tissue Homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.05mg/L-10mg/L
Sensitivity	0.016mg/L
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for IgG1 elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Hamster High Sensitivity C-Reactive Protein 6 (also known as HS-CRP) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Hamster HS-CRP antibody. HS-CRP present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Hamster HS-CRP Antibody is added and binds to HS-CRP in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated HS-CRP antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Hamster HS-CRP. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
