

Human Immunoglobulin D, IgD ELISA Kit | IgD elisa kit

Human Immunoglobulin D, IgD ELISA Kit

CATALOG #
AAA41428

REACTIVITY
Human

PRODUCT SYNONYMS

Immunoglobulin D; IgD; Human Immunoglobulin D; IgD ELISA Kit; IgD elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	999
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids
Detection Range	0.3-90ng/ml
Sensitivity	0.18ng/ml
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for IgD elisa kit	Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human IgD antibody. IgD present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human IgD Antibody is added and binds to IgD in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated IgD antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human IgD. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm. Intended Uses: This sandwich kit is for the accurate quantitative detection of Human Immunoglobulin D (also known as IgD) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	402238463
NCBI Official Full Name	immunoglobulin D

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
