

Human Protein S, P-S ELISA Kit | P-S elisa kit

Human Protein S, P-S ELISA Kit

CATALOG #
AAA41666

REACTIVITY
Human

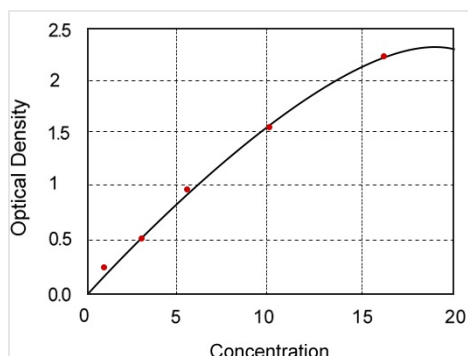

PRODUCT SYNONYMS

Protein S; P-S; Human Protein S; P-S ELISA Kit; P-S elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	11
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.5mg/L - 150mg/L
Sensitivity	0.22mg/L
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for P-S elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of human Protein S (also known as P-S) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human P-S antibody. P-S present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human P-S Antibody is added and binds to P-S in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated P-S antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human P-S. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

NCBI AND UNIPROT INFORMATION

NCBI GI #	7717469
NCBI Official Full Name	protein S, partial

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
