

Human Protein kinase A, PKA ELISA Kit | PKA elisa kit

Human Protein kinase A, PKA ELISA Kit

CATALOG #
AAA41873

REACTIVITY
Human

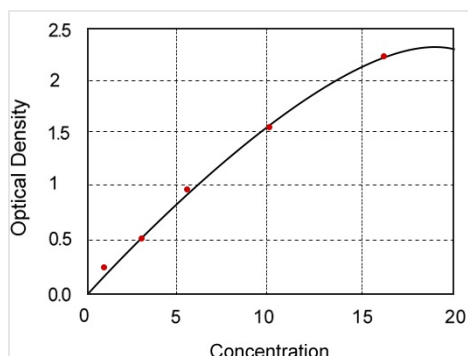

PRODUCT SYNONYMS

Protein kinase A; PKA; Human Protein kinase A; PKA ELISA Kit; PKA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	390
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.2ng/ml - 60ng/ml
Sensitivity	0.108ng/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for PKA elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of human Protein Kinase A (also known as PKA) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human PKA antibody. PKA present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human PKA Antibody is added and binds to PKA in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated PKA antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human PKA. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

NCBI AND UNIPROT INFORMATION

NCBI GI #	349929923
Molecular Weight	44,865 Da
NCBI Official Full Name	protein kinase A
UniProt Protein Name	Protein kinase A
UniProt Gene Name	CLF_102860

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
