

## Human Collectin-10 (COLEC10) ELISA Kit | COLEC10 elisa kit

Human Collectin-10 (COLEC10) ELISA Kit

CATALOG #  
**AAA41898**

REACTIVITY  
**Human**

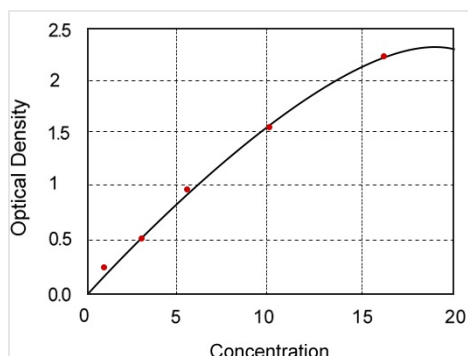

### PRODUCT SYNONYMS

Collectin-10 (COLEC10); Human Collectin-10 (COLEC10) ELISA Kit; COLEC10 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                          |
|-------------------------|--------------------------------------------------------------------------|
| Reactivity              | Human                                                                    |
| Sequence Length         | 208                                                                      |
| Samples                 | Serum, plasma, cell culture supernates, cell lysates, tissue homogenates |
| Assay Type              | Quantitative Sandwich                                                    |
| Detection Range         | 0.2ng/L - 70ng/L                                                         |
| Sensitivity             | 0.09ng/L                                                                 |
| Intra-Assay             | CV<8%                                                                    |
| Inter-Assay             | CV<10%                                                                   |
| Preparation and Storage | Store at 2 to 8 degree C for 6 months.                                   |

### ADDITIONAL INFORMATION

#### Related Product Information for COLEC10 elisa kit

**Intended Uses:** This sandwich kit is for the accurate quantitative detection of Rat Keratinocyte Growth Factor (also known as KGF) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

**Principles of the Assay:** This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Rat KGF antibody. KGF present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Rat KGF Antibody is added and binds to KGF in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated KGF antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Rat KGF. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
