

Human Phosphoglucomutase 1 (PGM1) ELISA Kit | PGM1 elisa kit

Human Phosphoglucomutase 1 (PGM1) ELISA Kit

CATALOG #
AAA42043

REACTIVITY
Human

PRODUCT SYNONYMS

Phosphoglucomutase 1 (PGM1); Human Phosphoglucomutase 1 (PGM1) ELISA Kit; PGM1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids
Detection Range	15-3000ng/L
Sensitivity	7.94ng/L
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for PGM1 elisa kit

Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human PGM1 antibody. PGM1 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human PGM1 Antibody is added and binds to PGM1 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated PGM1 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human PGM1. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

Intended Uses: This sandwich kit is for the accurate quantitative detection of Human Phosphoglucomutase 1 (also known as PGM1) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
