ADDITIONAL INFORMATION

Related Product Information for ICAM-3 elisa kit	Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Mouse ICAM-3 antibody. ICAM-3 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Mouse ICAM-3 Antibody is added and binds to ICAM-3 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated ICAM-3 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Mouse ICAM-3. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm. Intended Uses: This sandwich kit is for the accurate quantitative detection of Mouse intercellular adhesion molecule 3 (also known as ICAM-3) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.
