

Human Carboxyterminal propeptide of type III procollagen, PIICP ELISA Kit | PIICP elisa kit

Human Carboxyterminal propeptide of type III procollagen, PIICP ELISA Kit

CATALOG # AAA42591	REACTIVITY Human
------------------------------	----------------------------

PRODUCT SYNONYMS

Carboxyterminal propeptide of type III procollagen; PIICP; Human Carboxyterminal propeptide of type III procollagen; PIICP ELISA Kit; PIICP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	1ng/ml - 380ng/ml
Sensitivity	0.46ng/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for PIICP elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Human Carboxyterminal Propeptide of Type ? Procollagen (also known as P?CP) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human P?CP antibody. P?CP present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human P?CP Antibody is added and binds to P?CP in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated P?CP antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human P?CP. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
