

Human staphylococcal protein A, SPA ELISA Kit | SPA elisa kit

Human staphylococcal protein A, SPA ELISA Kit

CATALOG #
AAA42612

REACTIVITY
Human

PRODUCT SYNONYMS

staphylococcal protein A; SPA; Human staphylococcal protein A; SPA ELISA Kit; SPA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	88
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	10ng/ml - 3800ng/ml
Sensitivity	5.02ng/ml
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for SPA elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of Human Staphylococcal Protein A (also known as SPA) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates. Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human SPA antibody. SPA present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human SPA Antibody is added and binds to SPA in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated SPA antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human SPA. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

NCBI AND UNIPROT INFORMATION

NCBI GI #	2654280
NCBI Official Full Name	staphylococcal protein A, partial

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
