

Human Fibrin, Fib ELISA Kit | Fib elisa kit

Human Fibrin, Fib ELISA Kit

CATALOG #
AAA42793

REACTIVITY
Human

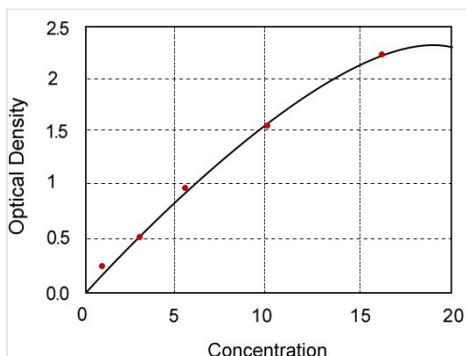

PRODUCT SYNONYMS

Fibrin; Fib; Human Fibrin; Fib ELISA Kit; Fib elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.5ng/ml - 200ng/ml
Sensitivity	0.22ng/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for Fib elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of human Fibrin (also known as Fib) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human Fib antibody. Fib present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human Fib Antibody is added and binds to Fib in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated Fib antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human Fib. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
