

Human tumor necrosis factor-related apoptosis inducing ligand, sTRAIL ELISA Kit | sTRAIL elisa kit

Human soluble tumor necrosis factor-related apoptosis inducing ligand, sTRAIL ELISA Kit

CATALOG #

AAA42869

REACTIVITY

Human

PRODUCT SYNONYMS

tumor necrosis factor-related apoptosis inducing ligand; sTRAIL; Human soluble tumor necrosis factor-related apoptosis inducing ligand; sTRAIL ELISA Kit; sTRAIL elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	20ng/L - 6000ng/L
Sensitivity	10.59ng/L
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for sTRAIL elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of human Soluble Tumor Necrosis Factor-related Apoptosis Inducing Ligand (also known as STRAIL) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates. Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human STRAIL antibody. STRAIL present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human STRAIL Antibody is added and binds to STRAIL in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated STRAIL antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human STRAIL. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
