ADDITIONAL INFORMATION

Related Product Information for MAPK1/MAPK elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of human Mitogen Activited Protein Kinase 1 (also known as MAPK1/MAPK) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.` Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human MAPK1/MAPK antibody. MAPK1/MAPK present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human MAPK1/MAPK Antibody is added and binds to MAPK1/MAPK in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated MAPK1/MAPK antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human MAPK1/MAPK. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
