

Rat ovalbumin specific IgG, OVA slgG ELISA Kit | OVA slgG elisa kit

Rat ovalbumin specific IgG, OVA slgG ELISA Kit

 CATALOG #
AAA43155

 REACTIVITY
Rat

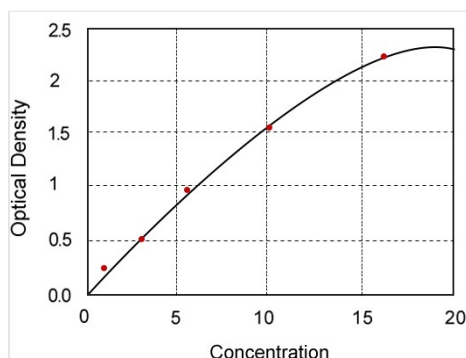

PRODUCT SYNONYMS

ovalbumin specific IgG; OVA slgG; Rat ovalbumin specific IgG; OVA slgG ELISA Kit; OVA slgG elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.5ug/ml - 150ug/ml
Sensitivity	0.25ug/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for OVA slgG elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Rat Ovalbumin Specific IgG (also known as OVA slgG) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Rat OVA slgG antibody. OVA slgG present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Rat OVA slgG Antibody is added and binds to OVA slgG in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated OVA slgG antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Rat OVA slgG. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
