

## Rat Thromboxane B2, TXB2 ELISA Kit | TXB2 elisa kit

Rat Thromboxane B2, TXB2 ELISA Kit

CATALOG #  
**AAA43180**

REACTIVITY  
**Rat**

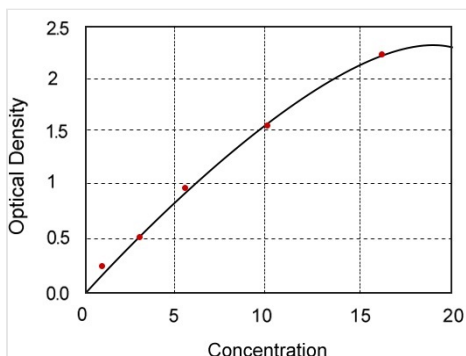

### PRODUCT SYNONYMS

Thromboxane B2; TXB2; Rat Thromboxane B2; TXB2 ELISA Kit; TXB2 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                          |
|-------------------------|--------------------------------------------------------------------------|
| Reactivity              | Rat                                                                      |
| Samples                 | Serum, plasma, cell culture supernates, cell lysates, tissue homogenates |
| Assay Type              | Quantitative Sandwich                                                    |
| Detection Range         | 5pg/ml - 1000pg/ml                                                       |
| Sensitivity             | 2.51pg/ml                                                                |
| Intra-Assay             | CV<8%                                                                    |
| Inter-Assay             | CV<10%                                                                   |
| Preparation and Storage | Store at 2 to 8 degree C for 6 months.                                   |

### ADDITIONAL INFORMATION

#### Related Product Information for TXB2 elisa kit

**Intended Uses:** This sandwich kit is for the accurate quantitative detection of Rat Thromboxane B2 (also known as TXB2) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

**Principles of the Assay:** This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Rat TXB2 antibody. TXB2 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Rat TXB2 Antibody is added and binds to TXB2 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated TXB2 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Rat TXB2. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
