

Human proteinase-antineutrophil cytoplasmic antibody, PR3-ANCA ELISA Kit | PR3-ANCA elisa kit

Human proteinase-antineutrophil cytoplasmic antibody, PR3-ANCA ELISA Kit

CATALOG #

AAA43288

REACTIVITY

Human

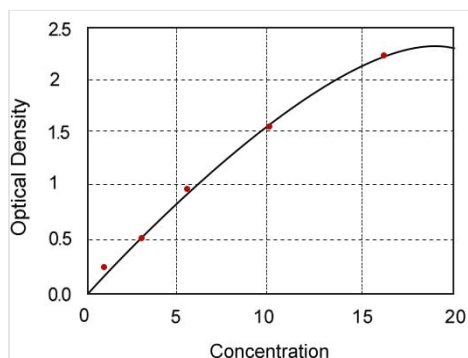

PRODUCT SYNONYMS

proteinase-antineutrophil cytoplasmic antibody; PR3-ANCA; Human proteinase-antineutrophil cytoplasmic antibody; PR3-ANCA ELISA Kit; PR3-ANCA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	2ng/ml - 600ng/ml
Sensitivity	1.03ng/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for PR3-ANCA elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of human Proteinase-antineutrophil Cytoplasmic Antibody (also known as PR3-ANCA) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates. Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human PR3-ANCA antibody. PR3-ANCA present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human PR3-ANCA Antibody is added and binds to PR3-ANCA in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated PR3-ANCA antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human PR3-ANCA. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
--	---

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
