

Human Thyroid-stimulating hormone receptor antibody (TSHR) ELISA Kit | TSHR elisa kit

Human Thyroid-stimulating hormone receptor antibody (TSHR) ELISA Kit

CATALOG #
AAA43335

REACTIVITY
Human

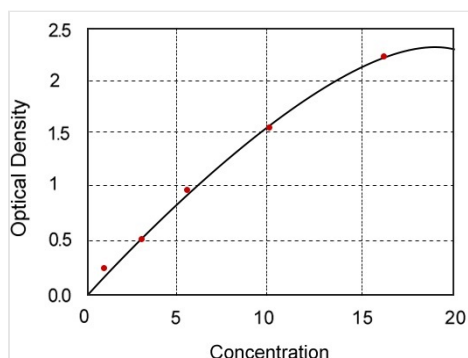

PRODUCT SYNONYMS

Thyroid-stimulating hormone receptor antibody (TSHR); Human Thyroid-stimulating hormone receptor antibody (TSHR) ELISA Kit; TSHR elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	0.5ng/ml - 150ng/ml
Sensitivity	0.27ng/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for TSHR elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of human Thyroid-stimulating Hormone Receptor Antibody (also known as TSHR) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human TSHR antibody. TSHR present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human TSHR Antibody is added and binds to TSHR in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated TSHR antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human TSHR. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
