

Chicken Luteinizing Hormone, LH ELISA Kit | LH elisa kit

Chicken Luteinizing Hormone, LH ELISA Kit

CATALOG #
AAA43430

REACTIVITY
Chicken

PRODUCT SYNONYMS

Luteinizing Hormone; LH; Chicken Luteinizing Hormone; LH ELISA Kit; LH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids
Detection Range	0.2-60mIU/ml
Sensitivity	0.12mIU/ml
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for LH elisa kit

Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Chicken LH antibody. LH present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Chicken LH Antibody is added and binds to LH in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated LH antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Chicken LH. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

Intended Uses: This sandwich kit is for the accurate quantitative detection of Chicken Luteinizing Hormone (also known as LH) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.
