

Mouse amyloid precursor protein beta, sAPPbeta ELISA Kit | sAPPbeta elisa kit

Mouse soluble amyloid precursor protein beta, sAPPbeta ELISA Kit

CATALOG #
AAA43468

REACTIVITY
Mouse

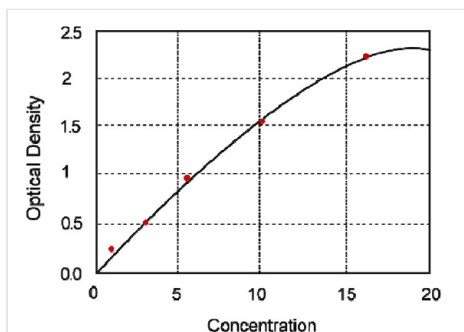

PRODUCT SYNONYMS

amyloid precursor protein beta; sAPPbeta; Mouse soluble amyloid precursor protein beta; sAPPbeta ELISA Kit; sAPPbeta elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids
Detection Range	0.5-300ng/mL
Sensitivity	0.31ng/mL
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for sAPPbeta elisa kit	Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Mouse sAPPbeta antibody. sAPPbeta present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Mouse sAPPbeta Antibody is added and binds to sAPPbeta in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated sAPPbeta antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Mouse sAPPbeta. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm. Intended Uses: This sandwich kit is for the accurate quantitative detection of Mouse soluble amyloid precursor protein beta (also known as sAPPbeta) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.
