Intended Uses: This sandwich kit is for the accurate quantitative detection of Mouse Interleukin 6 Receptor (also known as IL6R) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Mouse IL6R antibody. IL6R present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Mouse IL6R Antibody is added and binds to IL6R in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated IL6R antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Mouse IL6R. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
