ADDITIONAL INFORMATION

Related Product Information for ALDH6A1 elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of human Methylmalonate-semialdehyde Dehydrogenase[Acylating], Mitochondrial (also known as ALDH6A1) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates. Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human ALDH6A1 antibody. ALDH6A1 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human ALDH6A1 Antibody is added and binds to ALDH6A1 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated ALDH6A1 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human ALDH6A1. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
