ADDITIONAL INFORMATION

Related Product Information for MYBPC3 elisa kit	Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human MYBPC3 antibody. MYBPC3 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human MYBPC3 Antibody is added and binds to MYBPC3 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated MYBPC3 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human MYBPC3. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm. Intended Uses: This sandwich kit is for the accurate quantitative detection of Human Myosin Binding Protein C, Cardiac (also known as MYBPC3) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.
