

## Human Homeobox protein Hox-B3 (HOXB3) ELISA Kit | HOXB3 elisa kit

Human Homeobox protein Hox-B3 (HOXB3) ELISA Kit

CATALOG #  
**AAA44043**

REACTIVITY  
**Human**

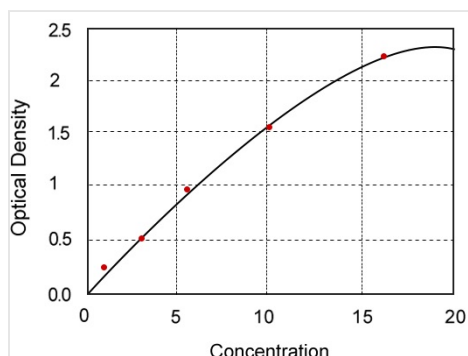

### PRODUCT SYNONYMS

Homeobox protein Hox-B3 (HOXB3); Human Homeobox protein Hox-B3 (HOXB3) ELISA Kit; HOXB3 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                          |
|-------------------------|--------------------------------------------------------------------------|
| Reactivity              | Human                                                                    |
| Sequence Length         | 299                                                                      |
| Samples                 | Serum, plasma, cell culture supernates, cell lysates, tissue homogenates |
| Assay Type              | Quantitative Sandwich                                                    |
| Detection Range         | 0.05ng/ml - 10ng/ml                                                      |
| Sensitivity             | 0.021ng/ml                                                               |
| Intra-Assay             | CV<8%                                                                    |
| Inter-Assay             | CV<10%                                                                   |
| Preparation and Storage | Store at 2 to 8 degree C for 6 months.                                   |

### ADDITIONAL INFORMATION

#### Related Product Information for HOXB3 elisa kit

**Intended Uses:** This sandwich kit is for the accurate quantitative detection of human Homeobox Protein Hox-B3 (also known as HOXB3) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

**Principles of the Assay:** This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human HOXB3 antibody. HOXB3 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human HOXB3 Antibody is added and binds to HOXB3 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated HOXB3 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human HOXB3. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
