

Human Complement C1q tumor necrosis factor-related protein 9 (CTRP-9) ELISA Kit | CTRP-9 elisa kit

Human Complement C1q tumor necrosis factor-related protein 9 (CTRP-9) ELISA Kit

CATALOG #

AAA44059

REACTIVITY

Human

PRODUCT SYNONYMS

Complement C1q tumor necrosis factor-related protein 9 (CTRP-9); Human Complement C1q tumor necrosis factor-related protein 9 (CTRP-9) ELISA Kit; CTRP-9 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	2ng/L - 600ng/L
Sensitivity	1.15ng/L
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for CTRP-9 elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of human Complement C1q Tumor Necrosis Factor-related Protein 9 (also known as CTRP-9) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates. Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human CTRP-9 antibody. CTRP-9 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human CTRP-9 Antibody is added and binds to CTRP-9 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated CTRP-9 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human CTRP-9. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
---	---

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
