

Human Complement C1q tumor necrosis factor-related protein 13 (CTRP-13) ELISA Kit | CTRP-13 elisa kit

Human Complement C1q tumor necrosis factor-related protein 13 (CTRP-13) ELISA Kit

CATALOG #

AAA44085

REACTIVITY

Human

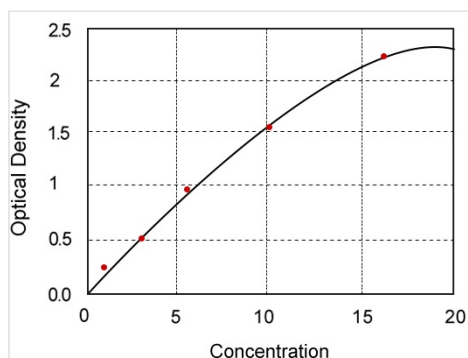

PRODUCT SYNONYMS

Complement C1q tumor necrosis factor-related protein 13 (CTRP-13); Human Complement C1q tumor necrosis factor-related protein 13 (CTRP-13) ELISA Kit; CTRP-13 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	20ng/L - 6000ng/L
Sensitivity	10.23ng/L
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for CTRP-13 elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of Human Complement C1q Tumor Necrosis Factor-related Protein 13 (also known as CTRP-13) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates. Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human CTRP-13 antibody. CTRP-13 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human CTRP-13 Antibody is added and binds to CTRP-13 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated CTRP-13 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human CTRP-13. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
