

Human Stromelysin-2 (sST2) ELISA Kit | sST2 elisa kit

Human Soluble Stromelysin-2 (sST2) ELISA Kit

CATALOG #
AAA44110

REACTIVITY
Human

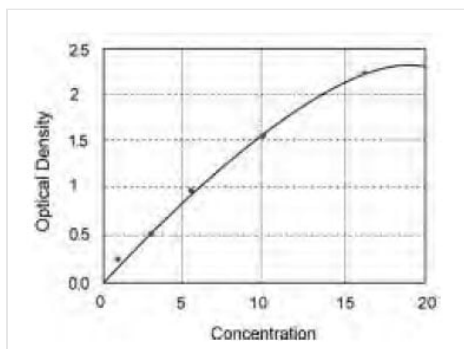

PRODUCT SYNONYMS

Stromelysin-2 (sST2); Human Soluble Stromelysin-2 (sST2) ELISA Kit; sST2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Assay Type	Quantitative Sandwich
Samples	Serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids
Detection Range	5-1000pg/ml
Sensitivity	2.36pg/ml
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for sST2 elisa kit

Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human sST2 antibody. sST2 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human sST2 Antibody is added and binds to sST2 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated sST2 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human sST2. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

Intended Uses: This sandwich kit is for the accurate quantitative detection of Human Soluble Stromelysin-2 (also known as sST2) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
