

Human Cytochrome B-245 heavy chain (CYBB) ELISA Kit | CYBB elisa kit

Human Cytochrome B-245 heavy chain (CYBB) ELISA Kit

CATALOG #
AAA44146

REACTIVITY
Human

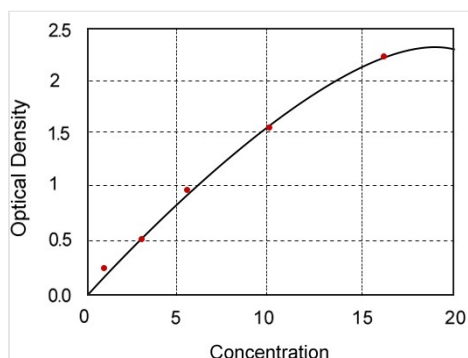

PRODUCT SYNONYMS

Cytochrome B-245 heavy chain (CYBB); Human Cytochrome B-245 heavy chain (CYBB) ELISA Kit; CYBB elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	10ng/L - 3000ng/L
Sensitivity	5.13ng/L
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for CYBB elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of human Cytochrome B-245 Heavy Chain (also known as CYBB) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human CYBB antibody. CYBB present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human CYBB Antibody is added and binds to CYBB in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated CYBB antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human CYBB. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
