

## Human Carboxypeptidase A4 (CPA4) ELISA Kit | CPA4 elisa kit

Human Carboxypeptidase A4 (CPA4) ELISA Kit

CATALOG #  
**AAA44152**

REACTIVITY  
**Human**

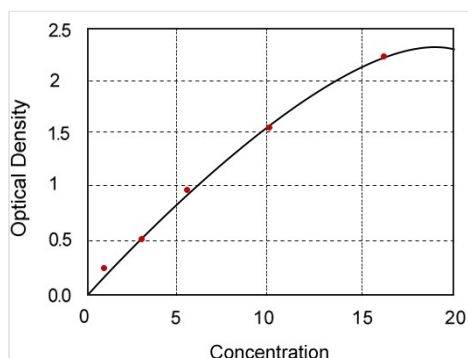

### PRODUCT SYNONYMS

Carboxypeptidase A4 (CPA4); Human Carboxypeptidase A4 (CPA4) ELISA Kit; CPA4 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                          |
|-------------------------|--------------------------------------------------------------------------|
| Reactivity              | Human                                                                    |
| Samples                 | Serum, plasma, cell culture supernates, cell lysates, tissue homogenates |
| Assay Type              | Quantitative Sandwich                                                    |
| Detection Range         | 0.05ng/ml - 15ng/ml                                                      |
| Sensitivity             | 0.01ng/ml                                                                |
| Intra-Assay             | CV<8%                                                                    |
| Inter-Assay             | CV<10%                                                                   |
| Preparation and Storage | Store at 2 to 8 degree C for 6 months.                                   |

### ADDITIONAL INFORMATION

#### Related Product Information for CPA4 elisa kit

**Intended Uses:** This sandwich kit is for the accurate quantitative detection of human Carboxypeptidase A4 (also known as CPA4) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

**Principles of the Assay:** This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human CPA4 antibody. CPA4 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human CPA4 Antibody is added and binds to CPA4 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated CPA4 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human CPA4. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
