

Human calprotectin ELISA Kit | calprotectin elisa kit

Human calprotectin ELISA Kit

CATALOG #
AAA44168

REACTIVITY
Human

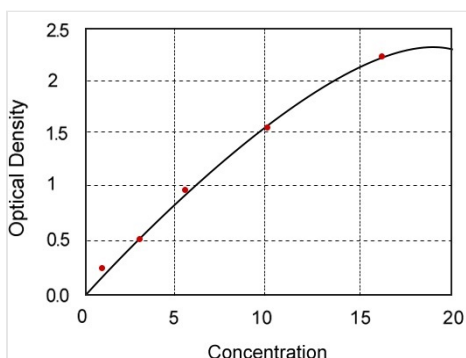

PRODUCT SYNONYMS

calprotectin; Human calprotectin ELISA Kit; calprotectin elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	2ng/ml - 600ng/ml
Sensitivity	1.67ng/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for calprotectin elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of human Calprotectin (also known as CAL) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human CAL antibody. CAL present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human CAL Antibody is added and binds to CAL in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated CAL antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human CAL. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
