

Human Isodesmosine, IDES ELISA Kit | IDES elisa kit

Human Isodesmosine, IDES ELISA Kit

CATALOG #
AAA44233

REACTIVITY
Human

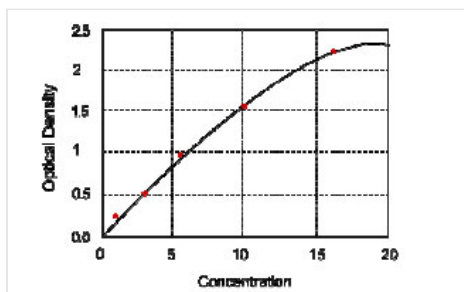

PRODUCT SYNONYMS

Isodesmosine; IDES; Human Isodesmosine; IDES ELISA Kit; IDES elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernates, ascites, tissue homogenates or other biological fluids
Assay Type	Quantitative Sandwich
Detection Range	20-6000ng/L
Sensitivity	9.67ng/L
Intra-assay Precision	Intra-Assay Precision (Precision within an assay) Three samples of known concentration were tested on one plate to assess intra-assay precision. Intra-Assay: CV<8%
Inter-assay Precision	Inter-Assay Precision (Precision between assays) Three samples of known concentration were tested in separate assays to assess inter-assay precision. CV(%) = SD/mean x 100. Inter-Assay: CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for IDES elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of Human Isodesmosine (also known as IDES) in serum, plasma, cell culture supernates, Ascites, tissue homogenates or other biological fluids.

Principle of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with Human IDES antibody. IDES present in the sample is added and binds to antibodies coated on the wells. And then biotinylated Human IDES Antibody is added and binds to IDES in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated IDES antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of Human IDES. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
