

Human Microtubule Associated Protein 1 (map-1) ELISA Kit | map-1 elisa kit

Human Microtubule Associated Protein 1 (map-1) ELISA Kit

CATALOG #
AAA44301

REACTIVITY
Human

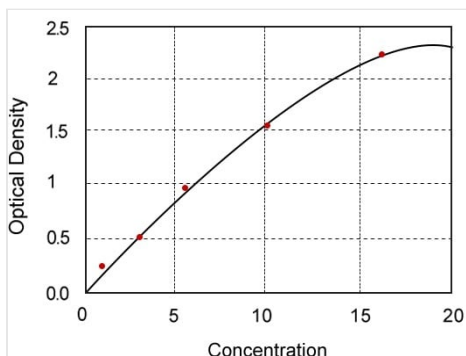

PRODUCT SYNONYMS

Microtubule Associated Protein 1 (map-1); Human Microtubule Associated Protein 1 (map-1) ELISA Kit; map-1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	10ng/L - 2000ng/L
Sensitivity	5.53ng/L
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

Related Product Information for map-1 elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of human Microtubule Associated Protein 1 (also known as MAP-1) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human MAP-1 antibody. MAP-1 present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human MAP-1 Antibody is added and binds to MAP-1 in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated MAP-1 antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human MAP-1. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
