

Human Drosha Double Stranded RNA Specific Endoribonuclease (Drosha) ELISA Kit | Drosha elisa kit

Human Drosha Double Stranded RNA Specific Endoribonuclease (Drosha) ELISA Kit

CATALOG #

AAA44336

REACTIVITY

Human

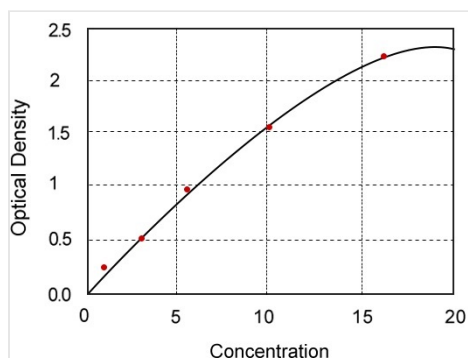

PRODUCT SYNONYMS

Drosha Double Stranded RNA Specific Endoribonuclease (Drosha); Human Drosha Double Stranded RNA Specific Endoribonuclease (Drosha) ELISA Kit; Drosha elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	20ng/L - 3500ng/L
Sensitivity	9.52ng/L
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for Drosha elisa kit	Intended Uses: This sandwich kit is for the accurate quantitative detection of human Drosha Double Stranded RNA Specific (also known as Drosha) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates. Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human Drosha antibody. Drosha present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human Drosha Antibody is added and binds to Drosha in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated Drosha antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human Drosha. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.
