

Human Glucosidase Beta Acid (GBA) ELISA Kit | GBA elisa kit

Human Glucosidase Beta Acid (GBA) ELISA Kit

CATALOG #
AAA44351

REACTIVITY
Human

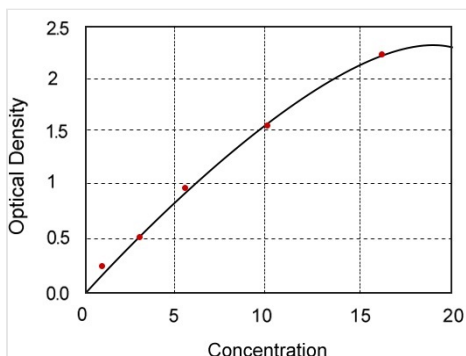

PRODUCT SYNONYMS

Glucosidase Beta Acid (GBA); Human Glucosidase Beta Acid (GBA) ELISA Kit; GBA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, cell culture supernates, cell lysates, tissue homogenates
Assay Type	Quantitative Sandwich
Detection Range	00.5ng/ml - 15ng/ml
Sensitivity	0.023ng/ml
Intra-Assay	CV<8%
Inter-Assay	CV<10%
Preparation and Storage	Store at 2 to 8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for GBA elisa kit

Intended Uses: This sandwich kit is for the accurate quantitative detection of human Glucosidase Beta Acid (also known as GBA) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

Principles of the Assay: This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human GBA antibody. GBA present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human GBA Antibody is added and binds to GBA in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated GBA antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human GBA. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
