

## Human Alkaline Phosphatase, Placental (ALPP) ELISA Kit | ALPP elisa kit

Human Alkaline Phosphatase, Placental (ALPP) ELISA Kit

CATALOG #  
**AAA44376**

REACTIVITY  
**Human**

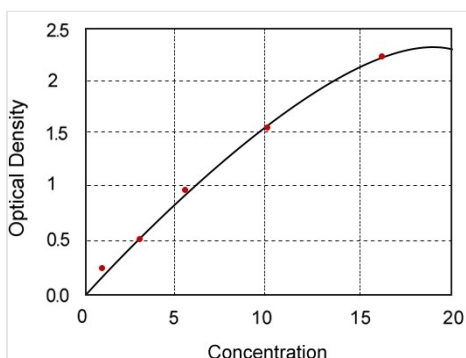

### PRODUCT SYNONYMS

Alkaline Phosphatase; Placental (ALPP); Human Alkaline Phosphatase; Placental (ALPP) ELISA Kit; ALPP elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                          |
|-------------------------|--------------------------------------------------------------------------|
| Reactivity              | Human                                                                    |
| Samples                 | Serum, plasma, cell culture supernates, cell lysates, tissue homogenates |
| Assay Type              | Quantitative Sandwich                                                    |
| Detection Range         | 0.05ng/ml - 10ng/ml                                                      |
| Sensitivity             | 0.024ng/ml                                                               |
| Intra-Assay             | CV<8%                                                                    |
| Inter-Assay             | CV<10%                                                                   |
| Preparation and Storage | Store at 2 to 8 degree C for 6 months.                                   |

### ADDITIONAL INFORMATION

#### Related Product Information for ALPP elisa kit

**Intended Uses:** This sandwich kit is for the accurate quantitative detection of human Alkaline Phosphatase, Placental (also known as ALPP) in serum, plasma, cell culture supernates, cell lysates, tissue homogenates.

**Principles of the Assay:** This kit is an Enzyme-Linked Immunosorbent Assay (ELISA). The plate has been pre-coated with human ALPP antibody. ALPP present in the sample is added and binds to antibodies coated on the wells. And then biotinylated human ALPP Antibody is added and binds to ALPP in the sample. Then Streptavidin-HRP is added and binds to the Biotinylated ALPP antibody. After incubation unbound Streptavidin-HRP is washed away during a washing step. Substrate solution is then added and color develops in proportion to the amount of human ALPP. The reaction is terminated by addition of acidic stop solution and absorbance is measured at 450 nm.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
