ADDITIONAL INFORMATION

Related Product Information for A2AP active protein	AAA Biotech is a leading supplier of human plasma Alpha-2 Antiplasmin for research and manufacturing. Custom preparations, technical support, bulk quantities and aliquoting available. Alpha-2 Antiplasmin (A2AP) is a serine protease inhibitor (serpin) responsible for inactivating plasmin, an important enzyme that participates in fibrinolysis and degradation of various other proteins. In liver cirrhosis, there is decreased production of alpha-2 antiplasmin, leading to lowered inactivation of plasmin and an increase in fibrinolysis. This is associated with an increase risk of bleeding in liver disease.
