ADDITIONAL INFORMATION

Related Product Information for RF active protein

Features: - Highly concentrated for minimum volume additions for control/calibrator manufacturing versus plasma or serum, saving money on other material components
- Native-sourced, mimicking elevated RF human donor samples during assay interference studies
- Ideal for spike-interference studies in assay development and validation
- Available in large batch sizes to minimize lot-to-lot variability

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
