

Mouse GM-CSF ELISA Kit | CSF2 elisa kit

Mouse GM-CSF PicoKine ELISA Kit

CATALOG #
AAA45295

REACTIVITY
Mouse

PRODUCT SYNONYMS

GM-CSF; Mouse GM-CSF PicoKine ELISA Kit; Granulocyte-macrophage colony-stimulating factor; colony stimulating factor 2 (granulocyte-macrophage); Colony stimulating factor; Colony stimulating factor 2 (granulocyte macrophage); CSF; CSF 2; CSF2; GMCSF; Granulocyte macrophage colony stimulating factor; MGC131935; MGC138897; Molgramostin; Sargramostim; CSF2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	Natural and recombinant Mouse Csf2
Sequence Length	141
Samples	Cell culture supernates, cell lysates, serum and plasma (heparin, edta)
Detection Range	15.6pg/ml-1000pg/ml
Sensitivity	<1pg/ml
Intra-assay Precision	Intra-Assay Precision (Precision within an assay): Three samples of known concentration were tested on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-Assay Precision (Precision across assays):Three samples of known concentration were tested in separate assays to assess interassay precision.
Preparation and Storage	Store at 4 degree C for 6 months, at -20 degree C for 12 months. Avoid multiple freeze-thaw cycles (Shipped with wet ice.)

ADDITIONAL INFORMATION

Related Product Information for CSF2 elisa kit

Principle of the Assay: The Picokine™ Mouse Csf2 Pre-Coated ELISA (Enzyme-Linked Immunosorbent Assay) kit is a solid phase immunoassay specially designed to measure Mouse Csf2 with a 96-well strip plate that is pre-coated with antibody specific for Csf2. The detection antibody is a biotinylated antibody specific for Csf2. The capture antibody is monoclonal antibody from rat, the detection antibody is polyclonal antibody from goat. The kit contains recombinant Mouse Csf2 with immunogen: Expression system for standard: E.coli; Immunogen sequence: A18-K141. The kit is analytically validated with ready to use reagents. To measure Mouse Csf2, add standards and samples to the wells, then add the biotinylated detection antibody. Wash the wells with PBS or TBS buffer, and add Avidin-Biotin-Peroxidase Complex (ABC-HRP). Wash away the unbounded ABC-HRP with PBS or TBS buffer and add TMB. TMB is substrate to HRP and will be catalyzed to produce a blue color product, which changes into yellow after adding acidic stop solution. The density of the yellow product is linearly proportional to Mouse Csf2 in the sample. Read the density of the yellow product in each well using a plate reader, and benchmark the sample wells' readings against the standard curve to determine the concentration of Mouse Csf2 in the sample.

Background/Introduction: Granulocyte-macrophage colony-stimulating factor(GM-CSF) is also symbolized CSF2. Human GM-CSF is a glycoprotein that is essential for the in vitro proliferation and differentiation of precursor cells into mature granulocytes and macrophages. The human cDNA clones contain a single open-reading frame encoding a protein of 144 amino acids with a predicted molecular mass of 16,293 daltons and show 69% nucleotide homology and 54% amino acid homology to mouse GM-CSF. The gene for human GM-CSF appears to exist as a single-copy gene. Human GMCSF is a 22,000-dalton glycoprotein that stimulates the growth of myeloid progenitor cells and acts directly on mature neutrophils. The GM-CSF gene is localized by somatic cell hybrid analysis and in situ hybridization to human chromosome region 5q21-5q32, which is involved in interstitial deletions in the 5q-syndrome and acute myelogenous leukemia. A complementary DNA for the T lymphocyte-derived lymphokine, GMCSF has been cloned, and recombinant GM-CSF protein has been expressed in yeast and purified to homogeneity. This purified human recombinant GM-CSF stimulates peripheral blood monocytes in vitro to become cytotoxic for the malignant melanoma cell line A375. The standard product used in this kit is recombinant mouse GM-CSF, consisting of 125 amino acids with the molecular mass of 14.8KDa.

NCBI AND UNIPROT INFORMATION

NCBI GI #	117562
NCBI GeneID	12981
UniProt Accession #	P01587
Molecular Weight	16,091 Da
NCBI Official Full Name	Granulocyte-macrophage colony-stimulating factor
NCBI Official Synonym Full Names	colony stimulating factor 2 (granulocyte-macrophage)
NCBI Official Symbol	Csf2
NCBI Official Synonym Symbols	Csfgm; GMCSF; Gm-CSF; MGI-IGM
NCBI Protein Information	granulocyte-macrophage colony-stimulating factor; CSF; put. GM-CSF; granulocyte-macrophage colony stimulating factor 2
UniProt Protein Name	Granulocyte-macrophage colony-stimulating factor
UniProt Gene Name	Csf2
UniProt Synonym Gene Names	Csfgm; GM-CSF; CSF
UniProt Entry Name	CSF2_MOUSE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
