

## Cy3 Conjugated Avidin Secondary Antibody

Cy3 Conjugated Avidin

|                              |                                                                                                                                |
|------------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| CATALOG #<br><b>AAA45606</b> | APPLICATIONS<br><b>Immunofluorescence, Immunofluorescence, Immunocytochemistry, Immunohistochemistry, Immunohistochemistry</b> |
|------------------------------|--------------------------------------------------------------------------------------------------------------------------------|

### PRODUCT SYNONYMS

Cy3 Conjugated Avidin; Polyclonal Secondary Antibody; Cy3 Conjugated Avidin secondary antibody

### PRODUCT SPECIFICATIONS

|                                                                      |                                                                                                                                             |
|----------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------|
| Clonality                                                            | Polyclonal                                                                                                                                  |
| Form/Format                                                          | Concentrated, Liquid                                                                                                                        |
| Concentration                                                        | 1mg/ml (varies by lot)                                                                                                                      |
| Applicable Applications for Cy3 Conjugated Avidin secondary antibody | IF (Immunofluorescence), IF (Immunofluorescence), ICC (Immunocytochemistry), IHC (Immunohistochemistry), IHC (Immunohistochemistry)         |
| Content                                                              | 0.5mg of affinity purified avidin (Purify >99%), F/P= 3-9/1, 0.0M PBS; 1% BSA; 0.01% Thimersosal.                                           |
| Labeling Method                                                      | Avidin is conjugated to Cy3 by means of a method described by Bayer,E.,et al. (Reference: Bayer, E.A. et al., Meth. Enzymol. 62,308 (1979)) |
| Preparation and Storage                                              | At 4 degree C for frequent use; at -20 degree C for at least one year in dark. Avoid multiple freeze-thaw cycles.                           |

### IMAGES

**IHC (Immunohistochemistry)**

Ki67 was detected in paraffin-embedded sections of human intestinal cancer tissues using rabbit anti- Ki67 Antigen Affinity purified polyclonal antibody at 1 ug/mL. Cy3 Conjugated Avidin was used for visualization at 10ug/mL.

**IHC (Immunohistochemistry)**

Beta Catenin was detected in paraffin-embedded sections of human intestinal cancer tissues using rabbit anti-Beta Catenin Antigen Affinity purified polyclonal antibody at 1ug/mL. Cy3 Conjugated Avidin was used for visualization at 10ug/mL.

### ADDITIONAL INFORMATION

#### Related Product Information for Cy3 Conjugated Avidin secondary antibody

**Description:** This antibody is purified from antiserum by immunoaffinity chromatography which keeps the specific antibody for Avidin.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
