### PRODUCT SYNONYMS

Cy3 Conjugated Goat Anti-Mouse IgG; Polyclonal Secondary Antibody; Cy3 Conjugated Goat Anti-Mouse IgG secondary antibody

### PRODUCT SPECIFICATIONS

|                                                                                   |                                                                                                                      |
|-----------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------|
| Host                                                                              | Goat                                                                                                                 |
| Clonality                                                                         | Polyclonal                                                                                                           |
| Specificity                                                                       | This Cy3 conjugated antibody is specific for mouse IgG and shows no cross-reactivity with human, bovine, rabbit IgG. |
| Form/Format                                                                       | Concentrated, Liquid                                                                                                 |
| Concentration                                                                     | 2mg/ml (varies by lot)                                                                                               |
| Applicable Applications for Cy3 Conjugated Goat Anti-Mouse IgG secondary antibody | ICC (Immunocytochemistry), IHC (Immunohistochemistry), IHC (Immunohistochemistry)                                    |
| Preparation and Storage                                                           | At 4 degree C for one year.                                                                                          |

### IMAGES

#### IHC (Immunohistochemistry)

PCNA was detected in paraffin-embedded sections of human intestinal cancer tissues using mouse anti-PCNA Antigen Affinity purified monoclonal antibody at 1 ug/mL. Cy3 Conjugated Goat Anti-Mouse IgG secondary antibody was used to detect the primary antibody at 20ug/mL.

#### IHC (Immunohistochemistry)

PCK was detected in paraffin-embedded sections of human intestinal cancer tissues using mouse anti-PCK Antigen Affinity purified monoclonal antibody at 1ug/mL. Cy3 Conjugated Goat Anti-Mouse IgG secondary antibody was used to detect the primary antibody at 20ug/mL.

### ADDITIONAL INFORMATION

#### Related Product Information for Cy3 Conjugated Goat Anti-Mouse IgG secondary antibody

**Description:** This antibody is purified from antiserum by immunoaffinity chromatography which removes essentially all goat serum proteins, except the specific antibody for mouse IgG. The antibody preparation is solid phase adsorbed with human serum proteins and bovine serum proteins to ensure minimal cross reactivity in tissue or cell preparations.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
