ADDITIONAL INFORMATION

Related Product Information for anti-SECTM1 antibody	Description: Rabbit IgG polyclonal antibody for Secreted and transmembrane protein 1b(SECTM1) detection. Tested with WB in Mouse. Background: SECTM1B is also known as Sectm1 or K12. Secreted and transmembrane protein 1 is a protein that in humans is encoded by the SECTM1 gene. This gene encodes a transmembrane and secreted protein with characteristics of a type 1a transmembrane protein. It is found in a perinuclear Golgi-like pattern and thought to be involved in hematopoietic and/or immune system processes.
