

COVID 19 Spike S1 NTD Coronavirus Recombinant Protein | S1-NTD recombinant protein

Recombinant SARS-CoV-2 (2019-nCoV) S1 protein NTD with C-terminal mouse Fc tag

CATALOG # AAA47277	HOST HEK293 cells	APPLICATIONS Western Blot
------------------------------	-----------------------------	-------------------------------------

PRODUCT SYNONYMS

COVID 19 Spike S1 NTD Coronavirus; Recombinant SARS-CoV-2 (2019-nCoV) S1 protein NTD with C-terminal mouse Fc tag; 2019 Novel Coronavirus; Coronavirus; CoV; COVID-19 virus; HCoV-2; Human Coronavirus 2019; SARS2; SARS-CoV-2; Severe acute respiratory syndrome coronavirus 2; Spike S1 NTD; S1-NTD recombinant protein

PRODUCT SPECIFICATIONS

Host	HEK293 cells
Purity/Purification	The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.
Form/Format	Lyophilized from sterile PBS, pH 7.4. Normally 5%-106% trehalose is added as protectants before lyophilization.
Sequence	S1proteinN TD(Ser13-L eu303)+mFc (Pro99-Lys 330)
Applicable Applications for S1-NTD recombinant protein	WB (Western Blot)
Source	SARS-CoV-2
Conjugation	C-Mouse Fc tag
Reconstitution	Reconstitute with deionized water
Preparation and Storage	Store at -80 degree C for 12 months (Avoid repeated freezing and thawing) Shipping: Blue Ice

ADDITIONAL INFORMATION

Related Product Information for S1-NTD recombinant protein	SARS-CoV-2 (Severe Acute Respiratory Syndrome Coronavirus 2) also known as Covid19 (2019 Novel Coronavirus) is a virus that causes illnesses ranging from the common cold to severe diseases. The spike protein is a type I transmembrane protein containing two subunits, S1 and S2. S1 mainly contains a receptor binding domain (RBD), which accounts for recognizing the cell surface receptor, ACE2. S2 contains basic elements needed for the membrane fusion. Recent publications indicate that S1-RBD domain can induce virus neutralizing-antibody and T cell response.
---	--

NCBI AND UNIPROT INFORMATION

NCBI GeneID	43740568
UniProt Accession #	P0DTC2
Molecular Weight	The protein has a predicted molecular mass of 59.1 kDa after removal of the signal peptide. The apparent molecular mass of S1-NTD-mFc is approximately 70-100 kDa due to glycosylation.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
