

## Goat VSV-G HRP Antibody

VSV-G Affinity Purified Antibody, HRP Conjugated

|                              |                     |                                                                             |
|------------------------------|---------------------|-----------------------------------------------------------------------------|
| CATALOG #<br><b>AAA47932</b> | HOST<br><b>Goat</b> | APPLICATIONS<br><b>ELISA, Immunocytochemistry, Immunoblot, Western Blot</b> |
|------------------------------|---------------------|-----------------------------------------------------------------------------|

### PRODUCT SYNONYMS

VSV-G HRP; VSV-G Affinity Purified Antibody; HRP Conjugated; anti-VSV-G HRP antibody

### PRODUCT SPECIFICATIONS

|                                                     |                                                                                                                                      |
|-----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| Host                                                | Goat                                                                                                                                 |
| Specificity                                         | Antibody was affinity-purified on the peptide.                                                                                       |
| Form/Format                                         | Liquid; 1mg/ml conjugated to horseradish peroxidase (HRP) in Phosphate Buffered Saline (PBS), pH 7.2, 0.2% BSA, 0.05% Pro-Clean 400. |
| Concentration                                       | 1.0mg/ml (varies by lot)                                                                                                             |
| Applicable Applications for anti-VSV-G HRP antibody | ELISA, ICC (Immunocytochemistry), IB (Immunoblot)                                                                                    |
| Antigen                                             | Synthetic peptide YTDIEMNRLGK conjugated to KLH.                                                                                     |
| Dilution Instruction                                | Dilute in PBS or medium that is identical to that used in the assay system.                                                          |
| Preservative                                        | 0.05% Pro-Clean 400                                                                                                                  |
| Molar Enzyme Antibody Ratio                         | 4:1                                                                                                                                  |
| Preparation and Storage                             | Store at 2-8°C.                                                                                                                      |

### IMAGES

#### Application Data

Detection of VSV-G-tagged fusion protein in 200, 100, and 50ng of E. coli lysate with AAA47932 diluted 1:25,000.

### ADDITIONAL INFORMATION

|                                                                |                                                                                                                                                                                                                              |
|----------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Related Product Information for anti-VSV-G HRP antibody</b> | The Vesicular Stomatitis Virus Glycoprotein (VSV-G) epitope tag is represented by the sequence YTDIEMNRLGK. This tag is often included in recombinant proteins to facilitate identification and isolation of those proteins. |

## NCBI AND UNIPROT INFORMATION

|                         |               |
|-------------------------|---------------|
| NCBI GI #               | 15072764      |
| NCBI Official Full Name | VSV-G protein |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
