PRODUCT SPECIFICATIONS

Host	Genetically engineered E Coli
Specificity	Recombinant human acidic FGF (FGF-1) In the presence of heparin, 45101 binds to most cells that express FGF receptor; binds to all known isoforms of FGF receptor.
Purity/Purification	>90% Purification: Purified by heparin affinity chromatography and HPLC; single band at 1 ug on silver-stained SDS-PAGE.
Biological Activity	The activity of acidic FGF at 1-10 ng/ml is determined by a cellular proliferation assay using mouse fibroblasts. The optimal concentration of this product for use with other cell types must be determined by the end user.
Diluent	0.1% trifluoroacetic acid + 40% acetonitrile.
Preservatives	None
Dilutions Instructions	Dilute with either 0.1% TFA/40% acetonitrile or PBS/0.1% CHAPS for best stability and to prevent absorption of product on walls of vessels.
Preparation and Storage	This product is stable for at least one (1) year at -20 degree C to -70 degree C. Keep frozen until use. Store product in appropriate aliquots to avoid multiple freeze-thaw cycles.
