

Mouse HLA DP DQ DR Monoclonal Antibody | anti-HLA DP DQ DR antibody

MOUSE ANTI HUMAN HLA DP DQ DR

CATALOG # AAA49415	HOST Mouse	APPLICATIONS Immunohistochemistry, Functional Assay, Flow Cytometry, Functional Assay
------------------------------	----------------------	---

PRODUCT SYNONYMS

HLA DP DQ DR; Monoclonal Antibody; MOUSE ANTI HUMAN HLA DP DQ DR; anti-HLA DP DQ DR antibody

PRODUCT SPECIFICATIONS

Host	Mouse
Clonality	Monoclonal
Isotype	IgG2a
Clone Number	WR18
Form/Format	Purified Purified IgG - liquid
Concentration	IgG concentration 1 mg/ml (varies by lot)
Applicable Applications for anti-HLA DP DQ DR antibody	IHC (Immunohistochemistry), FA (Functional Assay), FCM/FACS (Flow Cytometry)
Perservative Stabilisers	0.09% Sodium Azide Preparation
Histology Positive Control Tissue	Tonsil Buffer Solution
Target Species	Human
Preparation and Storage	Store at 4 degree C or at -20 degree C if preferred. This product should be stored undiluted. Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use. Shelf Life: 18 months from date of despatch.

IMAGES

Application Data

Staining of human peripheral blood lymphocytes with Mouse anti Human HLA Class II DP DQ DR

ADDITIONAL INFORMATION

Related Product Information for anti-HLA DP DQ DR antibody	Mouse anti Human HLA DP DQ DR antibody, clone WR18 reacts with a monomorphic determinant common to DP, DQ and DR beta chains, which are expressed by antigen presenting cells, B cells, monocytes and activated T lymphocytes. The major histocompatibility complex (MHC) is a cluster of genes that are important in the immune response to infections. In humans, this complex is referred to as the human leukocyte antigen (HLA) region. There are 3 major MHC class II proteins encoded by the HLA which are HLA DP, HLA DQ and HLA DR.
--	--

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
