ADDITIONAL INFORMATION

Related Product Information for anti-CD39 antibody	Mouse anti human CD39, clone A1 recognizes the human CD39 cell surface antigen, a ~70-100kDa molecule expressed on peripheral blood B cells, monocytes and T lymphocytes, and weakly by granulocytes. CD39 has intrinsic ecto-ATPase activity (Wang et al. 1996), and expression can be induced on T cells and increased on B cells, as a late activation antigen (Maliszewski et al. 1994). Mouse anti human CD39, clone A1 has been shown to block MHC independent target cell recognition by hapten-specific CTL (Scholzen et al. 2009).
